

NEL·i

CLIMATE. ENERGY. NATURE.

NEL-i unlocks the full value of Clean Fuels. Our cross-disciplinary team covers every stage of the lifecycle — from engineering design to the monetization of fuel and environmental attributes — to maximize returns for partners across the value chain.

A Strategic Extension of Your Team

We operate as partners, not just service providers, not just brokers. By aligning our interests with yours, we provide high-level, “in-house” expertise designed to create long-term value and shared success.

Optimizing the Value Stack

We manage the complex relationship between physical molecules and environmental credits to capture the highest possible market price.

- **Demand Generation:** We engage directly with end-users to build a consistent, premium market for your fuel.
- **Supply Matching:** We connect production with the right buyers for both physical fuel and environmental attributes.
- **Deal Structuring:** We buy & sell fuel and credits. Unmatched flexibility, tailored to your risk tolerance to optimize returns.
- **Market Intelligence:** Real-time monitoring of supply, demand, and deal flow to navigate market shifts and build resilient business models.
- **Creative Financing:** Solutions that secure cash flow, unlock capital for project development and hedge price risk for buyers.

Technical and Regulatory Expertise

We handle the technical and compliance hurdles that often stall project returns.

- **Turnkey Compliance:** Deep expertise in CFR, LCFS, and other standards ensures stress-free compliance through established relationships with regulators and verifiers.
- **Carbon Intensity and Pathway Application:** LCA, CI and GHG calculations optimized for credit creation. Development of new pathways for non-standard production processes and feedstocks.
- **Engineering Services:** Comprehensive support for FEED, feedstock analysis, and process optimization.
- **Regulatory Advocacy:** We interface directly with regulators to secure preferred outcomes and clear the path to compliance.

Leadership in Decarbonization

Beyond clean fuels, NEL-i is a recognized leader in corporate decarbonization and nature-based climate solutions.

- **Climate Action Plans:** We help companies quantify emissions, set targets, identify reduction opportunities, access funding and drive measurable ROI.
- **Nature-Based Solutions:** We fund and deploy sustainable production models using climate finance and carbon markets.
- **Offsetting:** We provide customized portfolios of carbon credits to help corporate buyers address hard-to-abate GHG emissions.
